Continued Positive Underlying Operating Performance at 30 June 2023

Higher performance relative to December 2022, driven by both organic growth and M&A

Weighted Average LTM Revenue & EBITDA Growth at 30 June 2023¹

Weighted Average LTM Revenue & EBITDA Growth at 30 June 2023¹

- Private equity value creation today is generally focused on organic growth, operational improvements, and M&A activity, rather than through debt paydown and multiple expansion
- NBPE's portfolio of companies on an aggregate basis is growing both on a revenue and EBITDA basis annually
 - All sectors contributed to top line growth, both organically and through M&A
 - c.80% of the portfolio reported positive LTM EBITDA growth with 22% of the portfolio growing LTM EBITDA >30%
- 70% of NBPE's Top 30 companies have completed M&A
 - Both strategic, transformative M&A and buy and build strategies are helping to drive value creation through new markets and geographies and consolidation in fragmented industries

Portfolio Valuation at 30 June 2023
Weighted Average EV / LTM EBITDA Multiple: 15.4x

Note: As of 30 June 2023. See endnote 4 for further information on analysis.

1. Growth rates exclude five companies: one used an industry specific measurement of cash flow, one company had anomalous percentage changes which the manager believed to be an outlier, and three companies were held less than one year. One company was included in the 30 June 2023 growth metrics, but was excluded at 31 December 2022 due to an extraordinary growth rate. If this company was excluded at 30 June 2023 from the growth metrics, LTM Revenue and LTM EBITDA would have been 14.3% and 14.4%, respectively.

Private Valuations Up in 2023

 - Public investments now constitute 10% of the portfolio fair value

Note: As of 31 December 2023. Numbers may not sum due to rounding.

NBPE has seen strong exits and valuation uplift relative to carrying values in recent years

Gross MOIC on Exits¹ (Full Exits Only)

Valuation Uplift on Exit² (All Exits, 5 Year Trailing as of January 2024)

Note: As of 31 January 2024.

1. Based on five-year trailing data as of 31 January 2024. Includes full exits only. Excludes partial exits, recapitalisations and IPOs until the stock is fully exited. Year represents the year of final exit. Exit year for public companies determined by the date of the final cash flow. Proceeds include funds that are currently in escrow but are expected to be received. Returns are presented on a “gross” basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and may lower returns).

2. Based on five-year trailing data as of 31 January 2024. Analysis includes 12 IPOs/stock receipts and 25 full direct equity investment exits on a five-year trailing basis. For portfolio companies which completed an IPO or where a portfolio company received stock consideration as part of a sale, the value is based on the closing share price on the closing date of the IPO/sale; however, NBPE remains subject to customary lockup restrictions. Returns are presented on a “gross” basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and may lower returns).

M&A in US Private Equity Market

M&A for existing PE-owned companies has become an increasingly important value driver over time and remained at a high level in 2022 and 2023 after a record year in 2021

M&A

M&A has become an increasingly important driver of value

- Noticeable uptick in the number and value of add-on deals completed over the last two years – approximately 75% of all deals in the US private equity market consisted of portfolio company add-ons in 2023
- Can add complementary products to a company’s range, help it reach new geographies, access a wider array of customers, and/or bring economies of scale to the business
- Can also bring about synergies that result in improved processes, optimised resource allocation and operational efficiencies

M&A in NBPE's Portfolio

Both Roll-up and Transformation M&A helped drive value

Systematic / Roll-up M&A

This strategy involves the acquisition of multiple smaller companies, often within highly fragmented industries. The end goal is to integrate the businesses and create a company of larger value than the sum of its parts

M&A Activity: over the past six years has completed numerous acquisitions under KKR's ownership, growing revenue by 2.5 times

M&A Activity: In the ~2 years since AEA and NBPE invested in the business, Monroe has continued to execute on its successful acquisition playbook and has integrated an additional 10 businesses into the 'OneMonroe' platform

Transformational M&A

Strategic acquisitions can greatly change the breadth and depth of a business by adding economies of scale, complementary products, new go to market and geographic expansion. This can occur at any time in the ownership of a business and may be opportunistic or pre-identified at the time of investment

M&A Activity: In July 2023, Solenis acquired Diversey, a provider of hygiene, infection prevention and cleaning solutions, in an all-cash transaction valued at an enterprise value of \$4.6 billion. Transaction combines two industry leaders in adjacent but highly complementary markets through a transformational acquisition

M&A Activity: Numerous acquisitions, including three acquisitions in the last several years to expand product suite, including GL Education, Illuminate in 2022, Nearpod in 2021, and others. 40% of US schools rely on Renaissance solutions, and products are used for learning in more than 100 countries

Continuing to Back Our Winners

Since 2020, NBPE has maintained or re-invested over \$100 million of value into existing portfolio companies

Market Environment

Key Concerns Investors are Facing Today

Current market conditions are characterised by persistent inflation, elevated interest rates and continued high valuation multiples

Are private equity managers underwriting new investments to lower rates of return?

What is the impact of higher interest rates on private equity?

How will private equity be able to generate returns going forward?

How is NBPE positioned in this new environment?

Underwritten Returns Expectations Remain Consistent

Despite the increase observed in valuation multiples in recent years, expected returns for new investments have remained consistent

- High interest rates and continued high valuation multiples has not resulted in lower expected rates of return
- Private equity managers are continuing to underwrite new investments to ~24% gross IRR

Sources of Value Creation Have Evolved

Managers are focused on growth, both organic and through M&A

- Value creation today is focused on organic growth, operational improvements, and M&A activity, rather than through debt paydown and multiple expansion
- Multiple compression is expected

Note: As of June 2023.

1. Represents 10 NB co-investments from December 2005 – December 2006.

2. Represents average of last 10 Private Investment Portfolios and Co-Investments platform co-investments.

Importance of Organic Growth

Generating revenue and earnings growth is essential in a high interest rate environment

- As the chart on the left shows, on a weighted average basis across the portfolio, NBPE has grown both revenue and EBITDA annually, which are the primary drivers of value creation today¹
- Experienced GPs focused on executing on their underwriting plans are well positioned for the current market environment

Growth is the Primary Driver of Return

With debt as a lower percentage of the capital structure and investments more dependent on growth, interest rates impact risk more than base case returns

- Debt levels have remained consistent over time, but higher valuations today are being financed with equity
- With debt representing a smaller percentage of the capital structure than equity, we expect growth, rather than interest rates, will have a greater impact on future return generation
- Higher interest expense leads to lower free cash flow generation. Which is of less concern if EBITDA and revenue is growing, and a company has a strong interest coverage ratio

For illustrative and discussion purposes only. This example is presented for illustrative purposes only and are not actual results. If any assumptions used do not prove to be true, results may vary substantially.

NBPE's Top 30 Portfolio Companies' Leverage is Well Positioned at 30 June 2023

Top 30 NBPE portfolio companies have a healthy weighted average interest coverage ratio, minimal near-term debt maturities and the vast majority of debt is covenant lite

Drivers of Private Equity Returns

With the shift from market-based to skills-based factors, we expect private equity to continue to produce attractive returns but with higher dispersion of performance

We believe NBPE's bottom-up approach, selecting investments on a company-by-company basis by partnering with high-quality GPs in their core areas of expertise, is a highly effective strategy in today's environment

Appendix – UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments

UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments. The Manager acknowledges that companies may have a range of effects on employees, the community and the environment through their operations and products and services. The Manager believes that companies that exhibit leadership in managing material environmental, social, and governance considerations, are also often more resilient, competitively positioned, and may have lower risk profiles. Furthermore, the Manager believes that companies which can be considered as thematically aligned with addressing social and environmental challenges are by their nature, essential and that these business models may benefit from macroeconomic and demographic trends while also contributing meaningfully to addressing global social and environmental challenges, such as outlined by the United Nations Sustainable Development Goals (“UN SDGs”).

The Manager evaluates UN SDGs Thematic Alignment as follows:

- No potential UN SDGs thematic alignment: Companies whose operations or products/services may potentially conflict with the advancement of positive outcomes for people or the environment, such as outlined by the themes of the UN SDGs;
- Neutral potential UN SDGs thematic alignment: Companies that have a mixed or unknown benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential moderate UN SDGs thematic alignment: Companies that have an overall positive benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential high UN SDGs thematic alignment: Companies whose products or services offer solutions to long-term social and environmental challenges such as those outlined by the UN SDGs in addition to additional social or environmental dimensions as defined by the Impact Management Project.

The Manager strives to identify and invest in companies that it deems to have thematic alignment with the UN SDGs, where deemed financially beneficial to do so, while seeking to avoid exposure to companies that have known ESG-related controversies or business models it deems have no potential UN SDGs thematic alignment or that are otherwise inconsistent with the Manager's Responsible Investment Policy, as the Manager believes such exposure would otherwise present material risks to the future value of an investment.

Awards Disclosures

The Asset Management Awards are designed to recognize outstanding achievement in the UK/European institutional and retail asset management spaces. The Asset Management Awards' judging is undertaken by a group of judges with expertise across the UK/European institutional and retail asset management spaces. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by Insurance Asset Management's editorial team. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Awards and ratings are not indicative of the past or future performance of any Neuberger Berman product or service.

European Pensions, a leading publication for pension funds across Europe, launched these awards to give recognition to and honor the investment firms, consultancies and pension providers across Europe that have set the professional standards in order to best service European pension funds over the past year. Judging is undertaken by a group of judges with expertise across the European pension fund space. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Private Equity Wire, a specialist industry publication in Europe launched these awards to showcase excellence among industry participants. The publication partnered with Bloomberg to create a clearly defined methodology for selecting the award winners. Shortlists were created by Bloomberg from a fund manager universe including all funds managed by European-domiciled GPs with a minimum fund size of \$100 million. Asset band grouping thresholds were based on individual fund sizes – not overall GP assets under management in a category. Funds were grouped according to category and vintages from 2013 to 2018 and ranked on the basis of their net IRR. GPs with more than one fund ranked among the top performers across multiple vintages within any category were shortlisted. Winners from each category were then decided by majority vote from the publication's readers. The award does not constitute an investment recommendation. For portfolio companies which completed an IPO or where a portfolio company received stock consideration as part of a sale, the value is based on the closing share price on the closing date of the IPO/sale; however, NBPE remains subject to customary lockup restrictions. Returns are presented on a "gross" basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and will lower returns). Past performance is not a guarantee of future returns. Multiple calculation includes full exits only. Excludes partial exits, recapitalisations and IPOs until the stock is fully exited. 2. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. With 1,513 constituents as of January 2024, the index covers approximately 85% of the free float-adjusted market capitalisation in each country (MSCI World Factsheet, 31 January 2024, the latest available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.

One company was included in the 30 June 2023 growth metrics, but was excluded at 31 December 2022 due to an extraordinary growth rate.
